### What's New In?

4Media DVD to Apple TV Converter helps you convert DVDs to Apple TV compatible formats like MP4, MP3, MOV, FLV and WAV. It supports batch processing, allows to merge multiple ISO or IFO files into a single file, and many others. Main features: 1. Convert DVD to Apple TV compatible formats When it comes to creating media files, 4Media DVD to Apple TV Converter is as flexible as your needs and tastes. It allows you to set various options for encoding a DVD, including selecting a preset profile and choosing video and audio tracks, frame rate, bit rate and encoding mode. 2. Batch processing You can convert multiple ISO and IFO files to Apple TV compatible formats at one time. This feature is especially helpful when you have a lot of files to be converted, so you don't have to spend much time to finish the process. 3. Clip-merge When you do batch conversion and have to merge multiple ISO files into a single one, you need only one target file. You can select the clip you want to keep, and the rest will be merged into the selected clip. 4. Convenience tools You can make a custom output profile to meet your needs and set post-processing functions like setting video watermark, setting DVD properties, and many others. 5. Real-time conversion It can also convert live movies or videos without interrupting your work. 6. Power of 4Media software 4Media DVD to Apple TV Converter supports skins and languages for a more intuitive interface. It has a great response time and quickly finishes a task. It does not freeze or crash during our testing. 7. User-friendly interface 4Media DVD to Apple TV Converter provides a simple, intuitive, and friendly interface, which includes three separate tabs: General, Import and Conversion. General 4Media DVD to Apple TV Converter allows you to encode DVDs to formats supported by Apple TV, such as MP4, MP3, MOV, FLV and WAV. It can be used by both novices and experienced individuals. The interface of the program is clean and pretty intuitive. You can import a DVD folder, ISO or IFO file by using either the file browser, treeview or "drag and drop" method. Batch processing is allowed. In the list you can read the name, duration, number of chapters, output profile and size, along with status of each DVD. So, once you establish the destination folder and extension, you can proceed with the encoding job. But you can also modify audio and video properties when it comes to the name, size, quality, frame rate, aspect ratio, encode mode, sample frequency rate, channel mode and others. On top of that, you can preview clips in a small, built-in media player and capture frames, split DVDs by size, time
